# English 5: How to Research

***keywords, subject terms, peer-review***

# Today’s Goals…

1. Understand what keywords are and how to create them.
2. Review “popular” and “scholarly/peer-reviewed” sources.
3. Know how to use two databases at the end of this lesson.
4. Learn how to import citations via email from databases.

The New York Times

# Popular Sources

## Scholarly

- Examples include journals like Nature or The Journal of Sociology.
- Written by subject experts
- Written for other experts in the discipline and also students.
- Peer-Reviewed Articles are evaluated by other experts before they are considered for publication.

## Popular

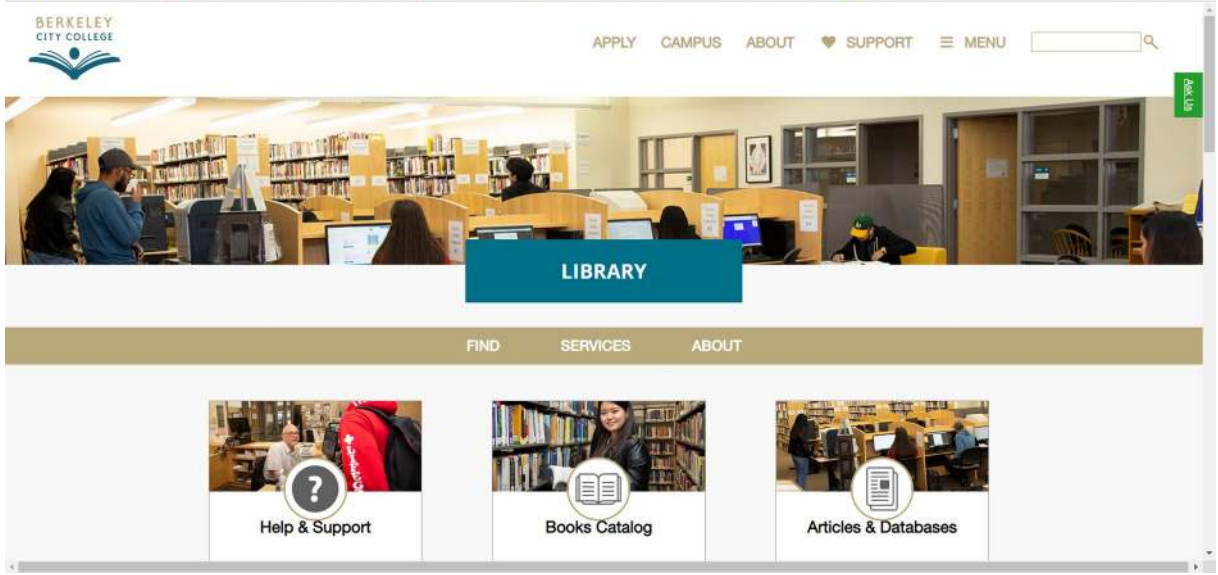
- Examples include: newspapers and magazines like Washington Post or The Economist.
- Written by journalists. Journalists are good writers and researchers, but they are not necessarily experts in the topic they are writing about.
- Written for a broad audience.
- Editors determine what is published

# What is Peer-Review?

# Berkeley Library Website

Question 1:
What’s the difference between a catalog and a database?

Question 2:
How do I find specific databases or ebooks?



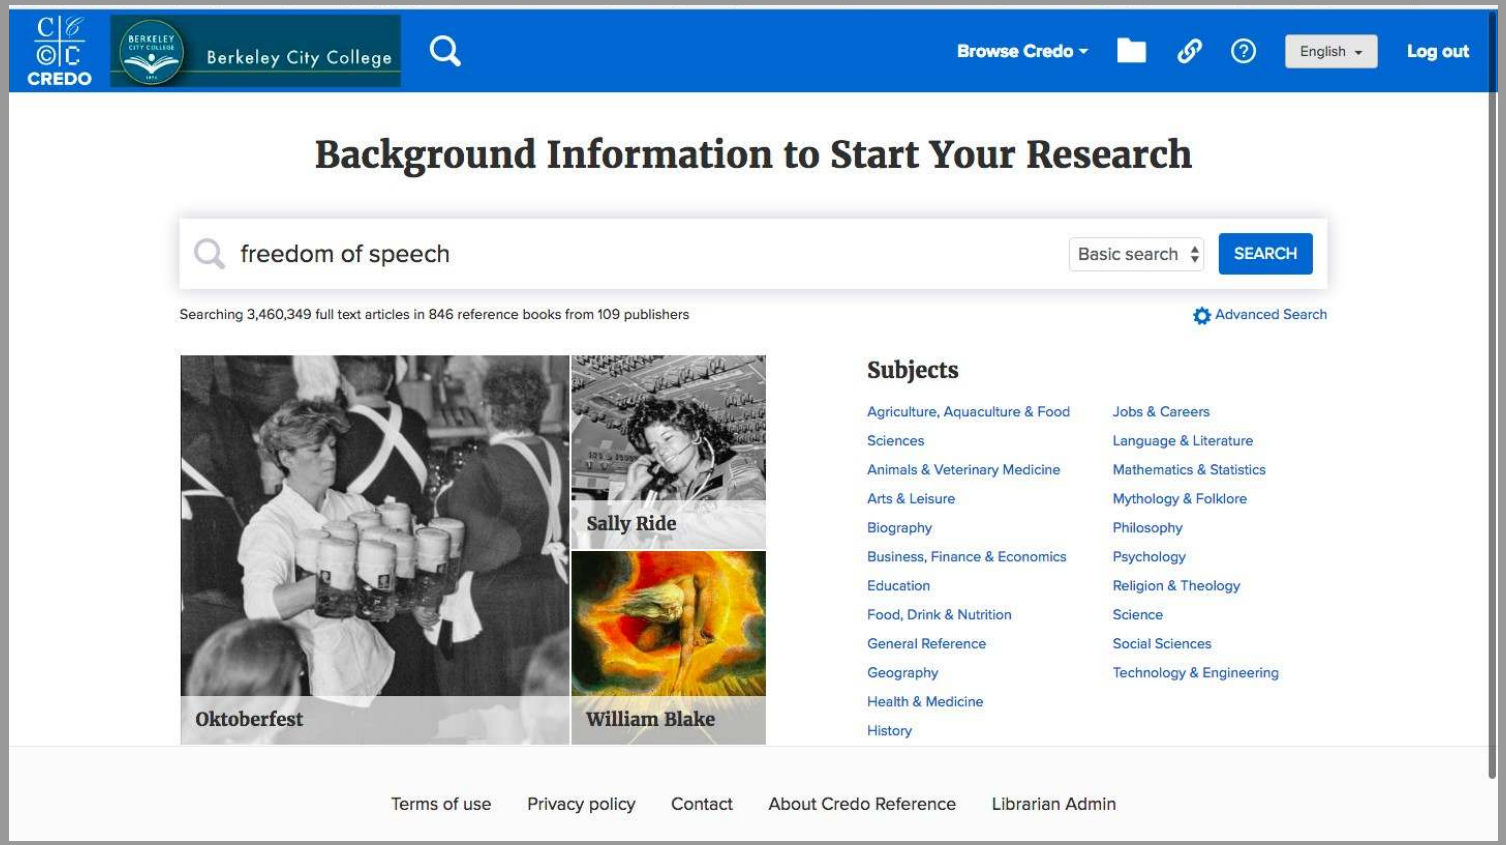
# What are keywords?

Keywords are short.

Keywords are nouns and main ideas.

Keywords are synonyms.

# Credo Reference (Encyclopedia)



# Practice Keywords!

# Broad--->Narrow--->Related

**Broad**

**Narrow**(name, gender, time period, subtype, location, title..)

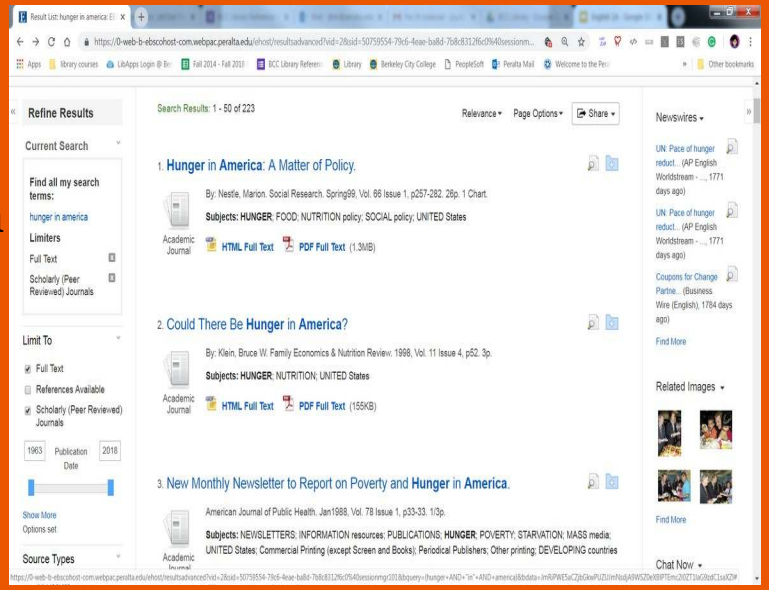
**Related**

# Go to Academic Search Complete Database

1) Type in a keyword for your topic and choose an article.

2) Select the article by clicking on the blue folder with the + sign (you select as many as you like).

3) When it turns yellow click on top menu with the Folder icon.



# Academic Search Complete

## 3 Ways to Search:

- New Search (Basic or Advanced using *keywords*)
- Subject Terms= *drop down menu, limiters, articles*
- Index

# In pairs do the following:

Create a chart of **Broad, Narrow,** and **Relative** keyword terms for your topic.

Write at least 3-5 words for each column and determine keywords

Use *Credo* and *Academic Search Complete* databases!

Feel free to use **subject terms**(index) to narrow down your topic.
