How to Research

keywords, subject terms, peer-review

Joy Kim
BCC Librarian

Today’s Goals…

1. Understand what keywords are and how to create them.
2. Review “popular” and “scholarly/peer-reviewed” sources.
3. Know how to use two databases at the end of this lesson.
4. Learn how to import citations via email from databases.

Library Services

The New York Times

Popular Sources

Scholarly

- Examples include journals like Nature or The Journal of Sociology.
- Written by subject experts
- Written for other experts in the discipline and also students.
- Peer-Reviewed Articles are evaluated by other experts before they are considered for publication.

Popular

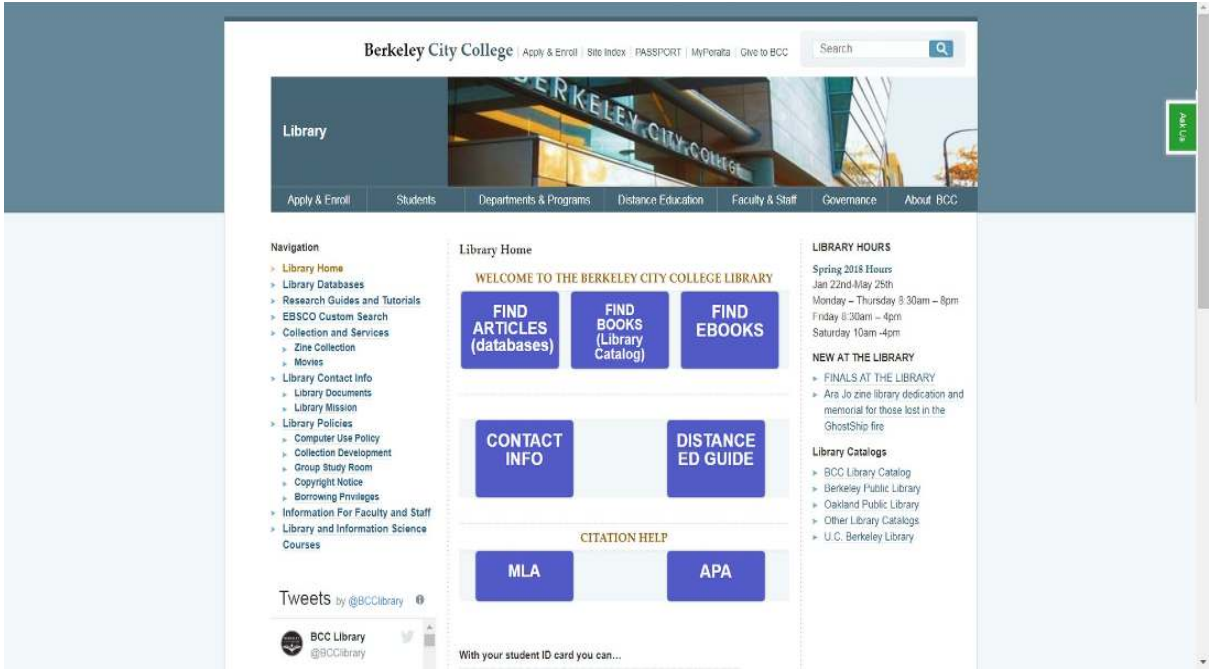
- Examples include: newspapers and magazines like Washington Post or The Economist.
- Written by journalists. Journalists are good writers and researchers, but they are not necessarily experts in the topic they are writing about.
- Written for a broad audience.
- Editors determine what is published

What is Peer-Review?

Berkeley Library Website

Question 1:
What is the difference between a **Catalog** and **Database?**

Question 2:
How do I find the database I want?



What are keywords?

Keywords are short.

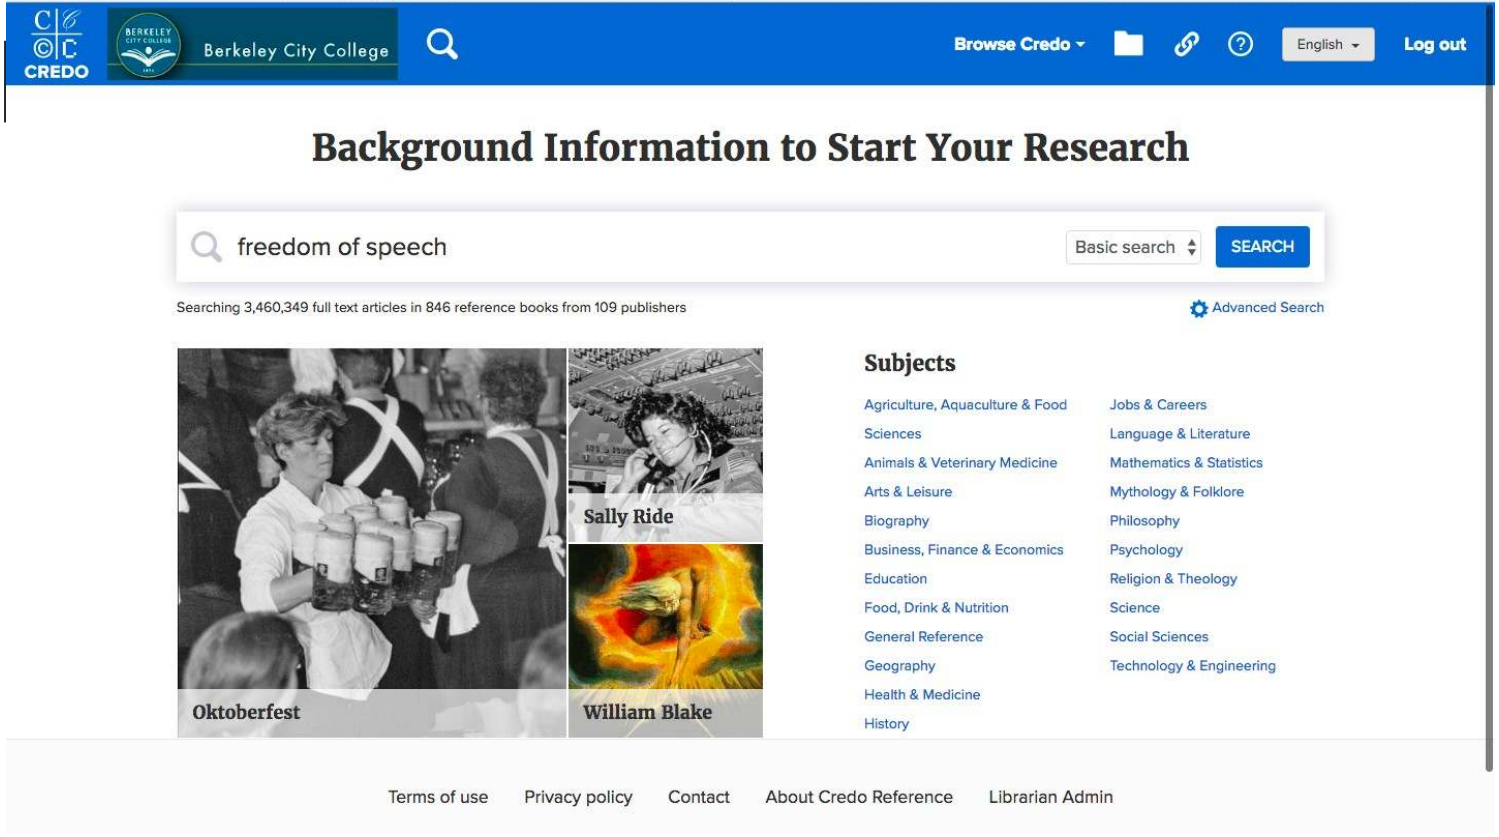
Keywords are nouns and main ideas.

Keywords are synonyms.

Keywords can change.

Credo Reference

(



Academic Search Complete

3 Ways to Search:

1. **New Search** **(Basic or Advanced using *keywords*)**
2. **Subject Terms=** ***drop down menu, limiters, articles***
3. **Index**

Practice Keywords- Homelessness

Broad--->Narrow--->Related

Example topic: Homelessness

Broad

Narrow(name, gender, time period, subtype, location, title..)

Related

In pairs do the following:

- Create a chart of **Broad, Narrow,** and **Relative** keyword terms for your topic

Find a partner who has the same topic and begin your search!

Write at least 3-5 words for each column and determine keywords
