How to Research

keywords, subject terms, peer-review

Joy Kim
BCC Librarian

Today’s Goals...

1. Understand what keywords are and how to create them.
2. Review “popular” and “scholarly/peer-reviewed” sources.
3. Know how to use two databases at the end of this lesson.

4. Learn how to import citations via email from databases.

Popular Sources

Scholarly

- Examples include journals like Nature or The Journal of Sociology.
- Written by subject experts
- Written for other experts in the discipline and also students.
- Peer-Reviewed Articles are evaluated by other experts before they are considered for publication.

Popular

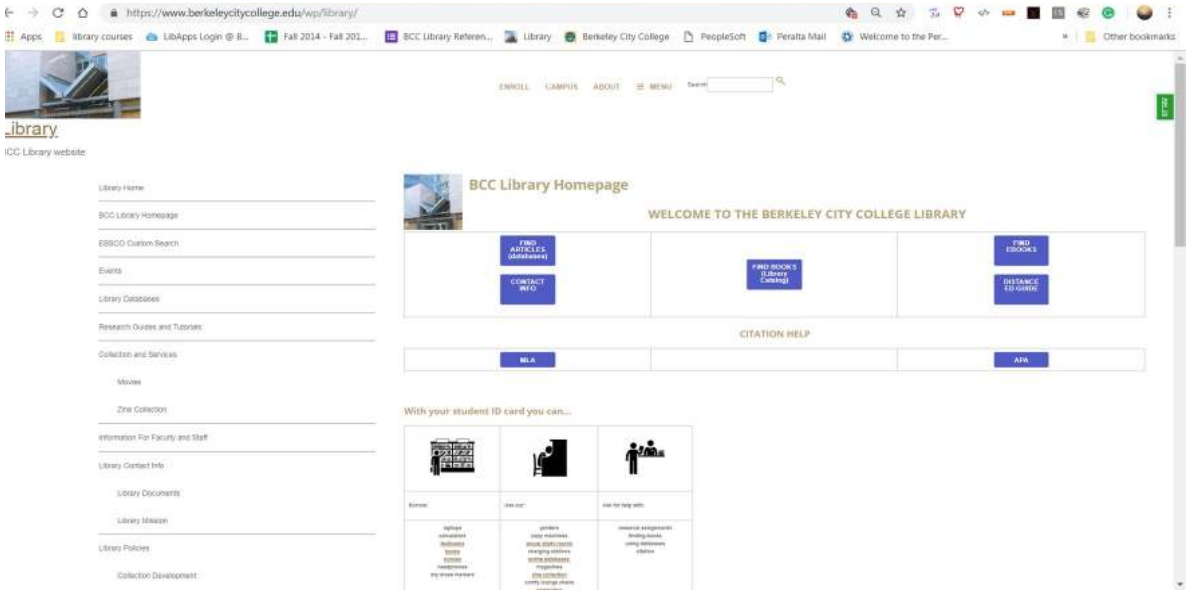
- Examples include: newspapers and magazines like Washington Post or The Economist.
- Written by journalists. Journalists are good writers and researchers, but they are not necessarily experts in the topic they are writing about.
- Written for a broad audience.
- Editors determine what is published

What is Peer-Review?

Berkeley Library Website

Question 1:
Where do you start when you begin to research?

Question 2:
How do I find the database I want?



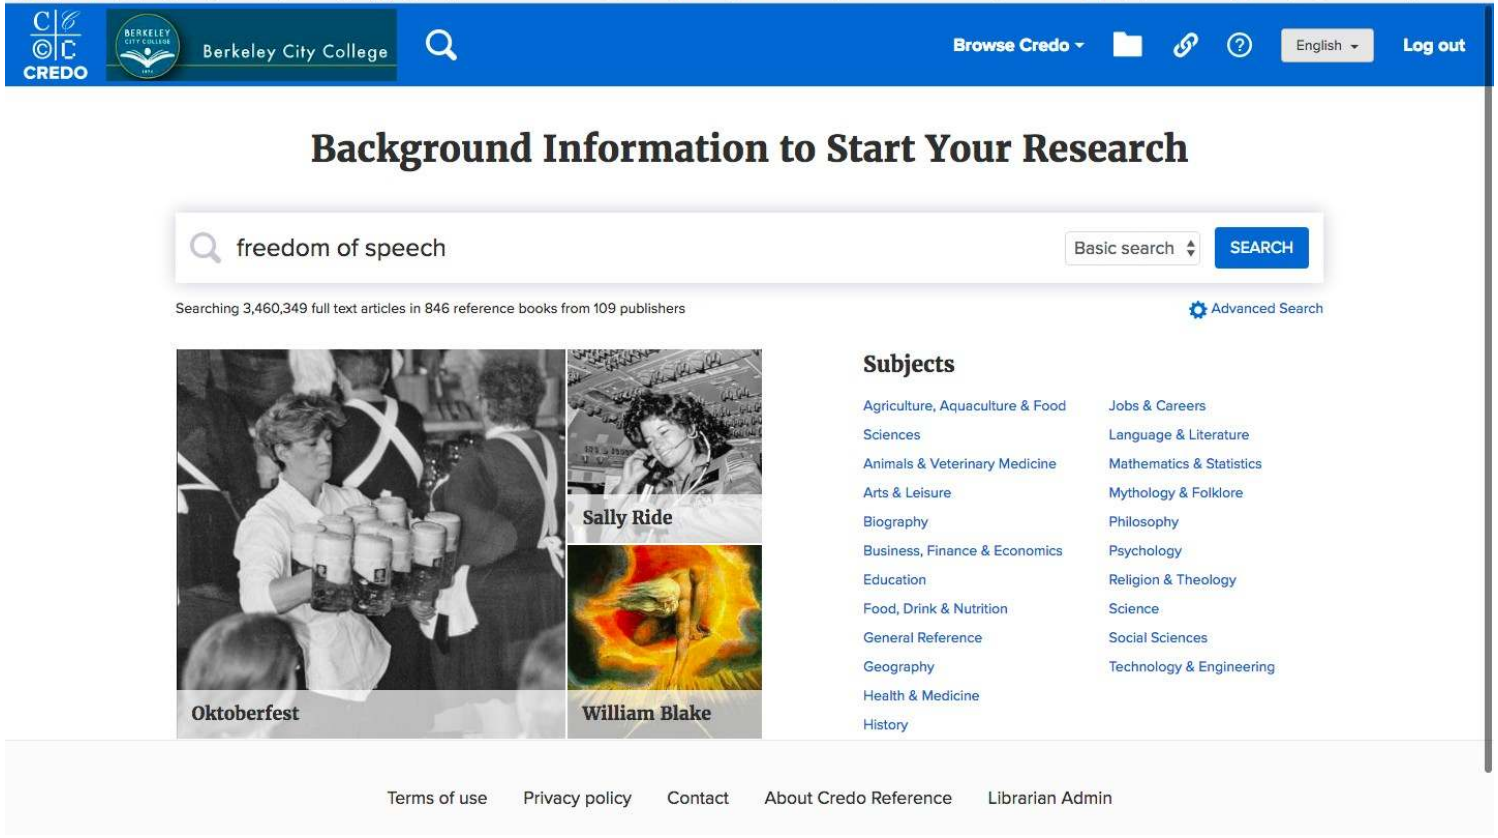
What are keywords?

Keywords are short.

Keywords are nouns and main ideas.

Keywords are synonyms.

Credo Reference (Encyclopedia)



Practice Keywords!

HUNGER

ADDICTION

Broad--->Narrow--->Related

Broad

Narrow(name, gender, time period, subtype, location, title..)

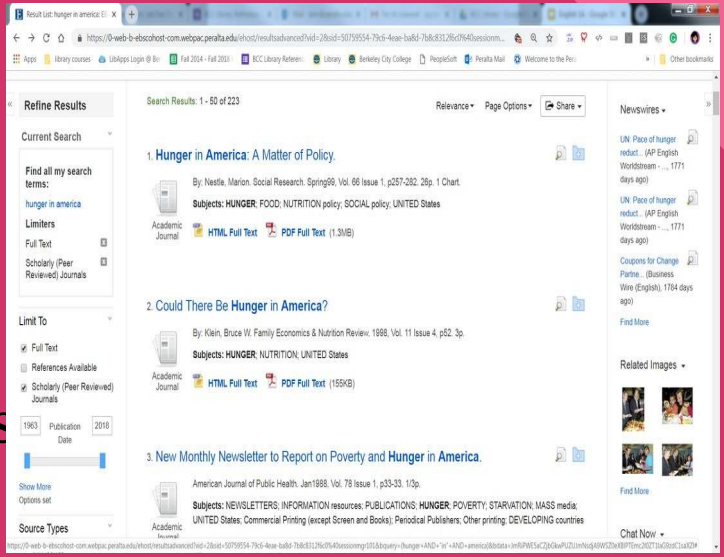
Related

Go to Academic Search Complete Database

1) Type in a keyword for your topic and choose an article.

2) Select the article by clicking on the blue folder with the + sign (you select as many as you like).

3) When it turns yellow click on top menu with the Folder icon.



Academic Search Complete

3 Ways to Search:

- New Search (Basic or Advanced using *keywords*)
- Subject Terms= *drop down menu, limiters, articles*
- Index

In pairs do the following:

Create a chart of **Broad, Narrow,** and **Relative** keyword terms for your topic

Find a partner who has the same topic (Hunger or Addiction) and begin your search!

Write at least 3-5 words for each column and determine keywords

Use *Credo* and *Academic Search Complete* databases!
